

JAI

A Flashback about North India's Largest International Wood Working Exhibition.

Encouraged by the overwhelming response we had at the INDIWOOD-2008 exhibition, Jai Industries participated in DELHIWOOD-2009 with its current & newly expanded product range. As with earlier exhibitions, Delhi Wood presented us with a unique opportunity to make our presence felt in North India – the heartland of panel processing, needless to mention that the wide range of machines & models backed by local sales, service & spare parts support was an ideal combination. The Jai Enclave had a comprehensive range of equipments to meet most of the wood working needs. Broadly – we emphasized on the three product lines, Jai-Wudpro, Jai-Modula, & Jai-SCM.

While we made this event bring forth the traditional machines from Jai - Wudpro line – combiplanner, surface/thickness planers, Moulding & sp.Design m/s, circular saws, sanders as well as some proven high quality machines like Duomax(Double side thicknesser),chain mortisers, basic routers, spindle moulders & many more. The Jai Modula line featured

the state of the art Post forming, Sliding Table Panel Saws, Hot Press, CNC Router, Manual /Auto Edge Banders, Spindle Moulder-SNT, Multi Boring and many more for meeting the most demanding panel processing needs. Visitors to the Jai Enclave were very curious with the CNC Router with its quality & price.

The Jai-SCM line left its mark by introducing the first of its kind in India, Olympic K500TER2 – Automatic edge bander with pre-milling/corner rounding/2-speed feeding facility. Visitors were really impressed with the quality of the edge banding result. Jai-SCM also introduced the Olympic 200 & Olympic 300 series of through feed edge banders which are a balance of economy and value. The Olympic K200/ME-20 can be installed even in small work shops with limited resources of space & electric power. It goes to show that Jai-SCM line can deliver high end quality, super

finish as well as consistent performance.

The visitor turnout and feedback have made us confident about the prospects of the wood working and panel processing industry in the new financial year and we hope to reach out to more and more customers by having a focused regional approach. We already have Jai Pan' Wood Machine Malls at Mumbai and newly opened at Chennai and are in process of completing Delhi & Ahmedabad very soon.
